

## How SpeechMotion Integrates with your EHR

SpeechMotion Healthcare Documentation Platform was designed by HIM and transcription managers to meet the evolving needs of documentation requirements, while **minimizing change and intrusion**. SpeechMotion's flexibility allows it to customize to the unique requirements of its users, from a single-practitioner facility to a multi-facility hospital. **The goal is to remain transparent, fitting into your workflow, not replacing it.**

The method in which your physicians currently dictate may continue. SpeechMotion accepts all industry standard dictation formats allowing you and your physicians to keep an already established dictation procedure in place. This eliminates the need for additional training of your physician staff, as well as the need to invest in new dictation equipment, software, or licensing.

### Transparent

*"Implementing SpeechMotion was very easy, with little to no interruptions"*
